## OUR 2 BEST SELLERS

Computer keyboards are the pencils of the future. Everyone benefits from being able to use the keyboard speedily: touch-typing. We think this method is the fastest and cheapest way to get the job done. Likewise, nearly everyone would benefit from piano for its lifetime gifts of superb mental development and enrichment. (Research shows kids score higher on tests after a bit of Mozart!)

### Zoom-Type

For ages 4 to 94. (117 pages and CD; item #1)

**\$29.95**

Touch-type in just 5 days! Don't you agree, computer programs simply aren't producing speedy typists? Students are playing educational games; playing typing games, even; but are not becoming fast, proficient keyboarders. Now you can change all that. ZOOM-TYPE is a revolutionary breakthrough in teaching touch-typing FAST by using the right brain. Hundreds of quick snapshots get you seeing, saying, and tapping the correct keys with the correct fingers in just 5 days--if you do it for 5 minutes, 5 times a day! Totally portable. **Includes audio CD.**

Plus, learn the numbers keypad by ordering **Speedy 10-Key** (\$5). It's a little kit for learning the 10-key numbers on the side of your keyboard.

Remember when you had to take piano lessons as a kid? Was it painful? Tedious? ## WHAT PEOPLE ARE SAYING!

### About the PIANO COURSE

*We are completely impressed with the QUICK PIANO program. Because my husband has some musical background he sat down and read through the whole course. Then he said, "I've been looking for this course all my life. When our son is through with this he'll be able to play ANYTHING with chords. This is the way piano should be taught in the 21st century." He wants to share QUICK PIANO with all our friends.*

(Mrs. Boren, Vail, Colorado)

*I never thought she could learn so much, so fast.* (Mrs. Cole, mother of Megan, age 6)

*Our daughter's self-esteem was plummeting when she began piano lessons the standard way. She would often say, "I just can't do this!" and felt like a failure. When she tried QUICK PIANO and was able to begin with a big sound instead of dull ditties, she took off.*

(Mrs. Harmon, mother of Hannah, age 9)

### About the TYPING PROGRAM

*Once in a while I come across a program that is so good I want to be sure that every parent learns about it. [ZOOM-TYPE] is such a program. It has far exceeded my expectations. In one week I've taught nine children to type the alphabet in under one minute with the keys blanked out, using proper finger strokes and without looking at the keyboard.*

(Dawn Wahl, South Dakota Curriculum Review)

*I looked all over for a typing course to teach typing the keyboard quickly and then reinforcing it. Everything I found was too tedious and took way to long to teach the keyboard. I am a firm believer in learning something in the most efficient and stress-free way possible. THIS IS IT FOR TYPING! It's so simple - it is amazing and it works. Basically the idea is to trick the Right Side of the brain to learn something and the left side follows. Does it work? You bet it works. In one week my 10 year old was typing the whole keyboard correctly. In two weeks he was typing at about 20 words a minute. Week three he was doing about 25 words a minute (all correctly fingered). Now he is just gaining speed! This program is no frills! No nonsense - yet easy, fun and doable. It's non-consumable, so you can use it with all your children. Even yourself. It will totally amaze you how quickly you learn and gain speed with this course.*

(Joan LaCelle, LaCelle Family Ministries)

"All your products sound so inviting! It's so hard to choose!"

"Your materials are so exciting to read, they are like *brain candy* to me! Your how-to booklets blow me out of tunnel vision." (Mrs. LaDue in Arizona)

Mrs. Ellison has more than 30 years of experience in the field of education—in Christian, private, secular, and home school settings. She home educated for nearly 20 years. Renée has taught nearly all grade levels, and was an elementary principal, head of a high school English department, was awarded Teacher of the Year, developed and ran gifted and talented programs, and has conducted numerous teacher training workshops.

Renée invented a system for learning how to touch-type that has been sold around the world, as has her similar system for learning how to play the piano. As a Bible-believing homeschooling mom, she delights in using her professional academic background to help others teach and train more effectively at home. Renée and her husband are the parents of one child, and work together to create homeschool how-to's and make them available to you.
